

Atlas Desktop Pilot

This synthetic document is intentionally self-contained. It is used to test PDF reading, page-level locators, citation links, and unsupported-question behavior in WorkPilot.

Project snapshot

Field	Controlled value
Program	Atlas Desktop Pilot
Owner	Mina Zhao
Region	East China
Pilot cohort	12 customers
Primary metric	At least 85% workflow completion

Decision principle

Reliability comes before pilot expansion. The cohort remains at 12 customers until permission boundaries and restart recovery both pass.

No phone number, email address, or external support contact is stated anywhere in this document. A correct answer to a request for a phone number must say that the information is not provided.

Three gates control release

All three gates are mandatory. A release is blocked if any single gate is incomplete.

Gate	Pass condition	Evidence owner
1. Smoke suite	100% of required smoke checks pass	Test Lead
2. Rollback drill	Rollback completes in 12 minutes or less	Ops Lead
3. Citation integrity	Every release claim has a valid locator	Evidence Reviewer

Interpretation

The smoke result is binary: 99% is not a pass. The rollback threshold is inclusive: exactly 12 minutes passes. Citation integrity applies to claims presented as release evidence, not to casual conversation.

Release rule: 3 of 3 gates must pass before pilot expansion.

P0 escalation clock

The clock starts when the incident is declared P0. The named owner for the incident process is the Ops Lead.

Milestone	Deadline	Required action
Acknowledge	Within 15 minutes	Confirm ownership and open the incident channel
Status update	Every 30 minutes	Publish impact, mitigation, and next checkpoint
RCA	Within two business days	Publish root cause, corrective actions, and owners

Closure condition

A P0 incident is not complete when service first recovers. Closure requires verified recovery, a named corrective-action owner, and an RCA delivered within two business days.

Controlled answer: owner = Ops Lead; acknowledgement = 15 minutes; RCA = two business days.
